TOOL KIT SEE SUPPLIERS *

- You do not need tools or glass for the first day of class. We will go over the tools and supply list in detail in the first session.

Glass:

- Fusible or compatible glass COE 90. Do not buy a large amount of any one color of glass to start because you may tire of you lack of choice. Consider buying small 10” pieces of clear, black or iridescent and or a small amount of dichroic glass. Some suppliers may have a starter pack which will include a selection of glass for a reduced price. It is difficult to estimate cost for each person as the projects can vary in size and cost of glass.
- SOURCES OF GLASS AND TOOLS * Discount offered to CCA students
